## INCIDENT OBJECTIVES (ICS 202)

<b>1. Incident Name:</b>  <div style="text-align: center;">PAWNEE</div>	<b>2. Operational Period:</b> <div style="display: flex; justify-content: space-between;"> <div>Date From: 6/28/2018 Time From: 0700</div> <div>Date To: 6/29/2018 Time To: 0700</div> </div>																				
<b>3. Objective(s):</b> <u>Strategic Objectives</u>  <p>A full suppression strategy is to be implemented on the Pawnee Incident. Values at risk associated to the incident include human safety, private property and associated improvements, electrical power infrastructure, and cultural values. Minimize acres burned on all lands by utilizing effective and efficient tactics while maintaining safety first.</p> <p><u>Leaders Intent</u></p> <p>Work effectively with cooperative partners towards a common goal of protecting values in a safe and efficient manner. All incident assigned personnel should be prepared to take the appropriate actions regarding:</p> <ul style="list-style-type: none"> <li>- Professional behavior, conduct timely/effective communications</li> <li>- Personal safety and safety of others, including driving slowly, safely and defensively</li> <li>- implementation of tactics that offer a high probability of success</li> <li>- Manage fatigue by taking breaks and maintaining work/rest cycles</li> </ul> <p><u>Management Objectives</u></p> <ul style="list-style-type: none"> <li>- Fight fire aggressively while maintaining safe work practices to minimize threats to the public and emergency responders</li> <li>- Minimize damage to structures, private property and other improvements in the fire area</li> <li>- Protect natural, cultural, heritage resources</li> <li>- Continue to foster and maintain positive relationships with all local cooperators and stakeholders</li> <li>- Provide timely and accurate incident information</li> <li>- Maintain fiscal accountability keeping costs commensurate with values at risk</li> </ul> <p><u>Control Objectives</u></p> <ul style="list-style-type: none"> <li>- Keep the fire North of Highway 20</li> <li>- Keep the fire East of High Valley Road</li> <li>- Keep the fire South of Bartlett Springs Road</li> <li>- Keep the fire West of Bear Valley Road</li> </ul>																					
<b>General Situational Awareness:</b>  <p>Steep and rugged terrain, critically dry and receptive fuel beds, active area for fire history and drought stressed trees.</p> <p><u>S</u>top, <u>T</u>hink, <u>O</u>rganize, <u>P</u>roceed</p>

## INCIDENT Weather Forecast

FORECAST NO:	2	NAME OF FIRE:	Pawnee Fire
PREDICTION FOR:	Thurs-Fri 0700-0700	UNIT:	Sonoma Lake Napa
SHIFT DATE:	June 28-29, 2018	Incident Meteorologist:	Dan Harty
FORECAST ISSUED:	1900 PDT, June 27, 2017		<i>Dan Harty</i>

**WEATHER DISCUSSION:** Little change in conditions is expected again today, but overnight winds are forecast to increase from the north as a significant pattern change begins to develop. High pressure will build in from the Pacific Friday and bring hotter and drier conditions along with strong northerly wind gusts through the weekend. A **Fire Weather Watch** remains in effect for the fire area Friday morning through Sunday evening. A cooling trend with lighter winds and higher humidity is expected early next week.

### *...Gusty Northerly Winds after Midnight...*

#### **WEATHER FORECAST for THURSDAY:**

WEATHER: Sunny. Areas of smoke.

MAX TEMPERATURES: 86-91°

MIN HUMIDITY: 23-28%

#### **20 FOOT WINDS:**

**SLOPE/VALLEY -** Calm to light downslope/downvalley 2-5 mph in the morning, becoming upslope/upvalley 4-8 mph with gusts around 12 mph in the afternoon.

**RIDGETOP -** Northeast 3-7 mph in the morning, becoming variable 5-8 mph with gusts around 15 mph in the afternoon.

#### **WEATHER FORECAST for THURSDAY NIGHT:**

WEATHER: Clear. Areas of smoke.

MIN TEMPERATURES: 62-67°

MAX HUMIDITY: 45-55%

#### **20-FOOT WINDS:**

**SLOPE/VALLEY -** Upslope/upvalley 3-6 mph with gusts to around 10 mph in the early evening, becoming downslope/downvalley 2-5 mph late in the evening. Wind becoming northerly 7-10 mph after midnight with gusts to around 15 mph.

**RIDGETOP -** Westerly 5-10 mph with gusts around 15 mph in the evening, becoming northerly 8-12 mph after midnight with gusts up to 20 mph.

**OUTLOOK for Friday:** ...**Fire Weather Watch**... Sunny with areas of smoke. Maximum temperatures 92-97. Minimum relative humidity 12-18 percent. Northerly winds 13-17 mph with gusts 25-30 mph.

## FIRE BEHAVIOR FORECAST

<b>FORECAST NUMBER:</b> 003	<b>TYPE OF FIRE:</b> Wildfire
<b>FIRE NAME:</b> Pawnee	<b>OPERATIONAL PERIOD:</b> June 28, 2018 Thursday
	<b>TIME ISSUED:</b> 1900
<b>UNIT:</b> CAL FIRE-Sonoma, Lake, Napa	<b>SIGNED:</b> 
	<b>Typed/printed:</b> Garrett Hazelton Fire Behavior Spec

### INPUTS

**WEATHER SUMMARY:** Daytime: Sunny with temps near 86°- 91°. Relative humidity 23% - 28%. 20 foot winds up slope/up valley 4-8mph: Ridgetop 3-7 mph with gust to 15 mph by late afternoon.

**Night time:** Weather will begin to transition into near red flag conditions setting up for the weekend. Clear with temps near 62°-67° and relative humidity 45-55%. 20 foot winds 5-10 w/ gusts to 12 mph becoming north overnight 8-12mp. Ridgetop winds near 20 mph gusts

### OUTPUTS

#### FIRE BEHAVIOR

##### GENERAL:

**Fire is Dependent on Strong Winds for an Increase in Fire Behavior Activity.**

Fire is burning in an oak woodland intermixed with high brush fuel loading on the north aspects. Areas of timber are well developed on the upper elevations. The grass and smaller brush fuel models are curing and can support fire runs in recent burns areas. The fuel bed is still recovering from previous years low fuel moistures which has caused a higher ratio of dead fuel within the brush. The alignment of topography and fuels with the rising wind speeds increases the threat for dynamic fire behavior activity. Should the fire become established within the heavier brush fuels in conjunction with the timber fuels the risk for long-range spotting is ½ - 1 mile is possible.

**The strongest winds of the day are forecasted to occur after midnight as a new weather pattern develops.**

##### SPECIFIC:

##### Branch I:

Weather and suppression efforts have resulted in a marked decrease in fire behavior over past days. Watch for latent heat sources to become active fire behavior in the late afternoon to early evening afternoon with the shifting wind direction. There are still islands of unburned fuel especially with in the wildland urban interface.

**Expected ROS: 60-80 chains/hr Flame Lengths 20'-30'**

**Branch V:** Fire has made good runs on the south and west facing aspects which has resulted in fuel islands on north facing slopes with heavy brush intermixed with timber at the upper elevations. These high loaded fuel islands increase risk for of head fire development if burning material gets outside established control lines. Long Canyon to the north has good indices for rapid fire development with the alignment of the north westerly winds approaching

**Expected ROS: 20-25 chains/hr Flame Lengths 20'-30'**

**Branch VI:** The fires edge across from Indian Reservoir towards Walker Ridge is buffered by smaller brush fuels recovering from a previous fire 10 years ago. The fires edge is expected to be in alignment with the winds by later afternoon which will raise the risk for fire activity. **Expected ROS: 20 chains/hr Flame Lengths 15'-20'**

**Branch VII:** Recent fire developments have brought the fires edge to fuel modifications from recent burn scars. Past burning periods have indicated that fire will carry in the grass fuels that have grown back under dead standing mixed conifer and oak hardwood species. **Expected ROS: 60-80 chains/hr Flame Lengths 20'-25'**

**AIR OPERATIONS:** Favorable weather conditions beginning in the morning expected to last for the day.

### SAFETY

Identify the potential for slope and wind alignment with head fire to develop.

Increasing high winds will contribute to a rapid rate of spread identify the fires potential before engagement.

Have your Primary plan in place with constant evaluation on Alternate and Contingencies.

Your Emergency plan must have time to execute to be achievable....PACE

Constant evaluation is paramount on routine days with live and dead fuels approaching critical levels.

## CALFIRE INCIDENT MANAGEMENT TEAM 3

# SAFETY MESSAGE

### Fatigue (n)

Inability to respond to situation: the temporary inability of somebody to respond to a situation as a result of overexposure or excessive activity.

- Trees are weakened due to fire activity. Look Up, Look Down, and Around.
- Watch for changing weather conditions.
- Monitor your hydration/nutrition intake and keep adequate supplies of each.
- Be cautious when working around dozers have communications with them.
- Accountability – Know where, and whom you are working for and be on time.
- Be aware of residents in and around the fire area.
- Identify and make everyone aware of escape routes.

### TREE MORTALITY TIPS

1. Provide timely feedback to others regarding any hazard trees.
2. Post look outs to help secure high-risk areas.
3. Keep clear of bucket drops.
4. Brief incoming units of identified tree hazards in the area.
5. Avoid hazards by designating "No Work Zones".
6. Empower everyone to speak up to ensure safety of all.

3. SAFETY ZONES AND ESCAPE ROUTES NOT IDENTIFIED

*David Sargenti*

## INCIDENT RISK ANALYSIS ICS 215A

BRANCH	HAZARDOUS ACTIONS/ CONDITIONS	MITIGATIONS/WARNINGS/REMEDIES
ALL	<b>FIRE AND DROUGHT WEAKENED TREES</b>	<ul style="list-style-type: none"> <li>Follow Hazard Tree Safety Guidelines IRPG (p. 22).</li> <li>Many of the trees within the fire area and along roadways are stressed. Snags are present.</li> <li>Be aware that trees may fall even if not impacted by the fire.</li> </ul>
ALL	<b>HAZARDOUS STRUCTURE</b>	<ul style="list-style-type: none"> <li>Follow Structure Size Up IRPG (p.13).</li> <li>Be aware of propane tank and natural gas hazards.</li> </ul>
ALL	<b>DRIVING HAZARDS</b>	<ul style="list-style-type: none"> <li><b>Watch your speeds and for blind corners.</b></li> <li>Be cautious when crossing bridges that may be weakened.</li> <li>Use extra caution with the extended drive times.</li> </ul>
ALL	<b>WEATHER</b>	<ul style="list-style-type: none"> <li>Watch for changing weather conditions.</li> <li>The local pattern is a daily afternoon wind shift. Stay prepared.</li> </ul>
ALL	<b>PERSONNEL SAFETY</b>	<ul style="list-style-type: none"> <li>All personnel are responsible for their personal safety.</li> <li>Be sure to wear all required PPE while on the fire line.</li> <li>Be cautious of snakes and yellowjackets within the fire area.</li> </ul>
ALL	<b>POWER LINES</b>	<ul style="list-style-type: none"> <li>Follow Power Line safety guidelines IRPG (p. 24).</li> <li>Treat all downed power lines as energized.</li> </ul>
ALL	<b>HYDRATION</b>	<ul style="list-style-type: none"> <li>Drink water before, during and after each shift.</li> <li>Be alert for signs of heat stress in yourself and others.</li> </ul>
ALL	<b>FATIGUE</b>	<ul style="list-style-type: none"> <li>Monitor incoming and outgoing resources for level of fatigue.</li> <li>Provide sufficient rest during the work cycle.</li> </ul>
ALL	<b>MOP UP</b>	<ul style="list-style-type: none"> <li>Do not get complacent during mop up.</li> <li>Watch your footing.</li> <li>Wear all appropriate PPE.</li> </ul>
ALL	<b>COMMUNICATIONS</b>	<ul style="list-style-type: none"> <li>Check the communication plan for frequency assignments.</li> <li>Use human repeaters as needed.</li> </ul>
ALL	<b>BRIEFINGS</b>	<ul style="list-style-type: none"> <li>Make sure <b>everyone</b> gets a briefing on the plan for the day.</li> <li>Document this on your ICS 214.</li> </ul>
ALL	<b>LCES</b>	<ul style="list-style-type: none"> <li>Ensure that LCES is being utilized.</li> </ul>
ALL	<b>AIRCRAFT AWARENESS</b>	<ul style="list-style-type: none"> <li>Be aware of rotor wash when working near helicopters.</li> <li>Understand that hazard trees may react to helicopters overhead.</li> <li>Monitor assigned aircraft frequencies.</li> </ul>
DIV. E/F	<b>CIVILIAN PRESENCE</b>	<ul style="list-style-type: none"> <li>Watch for increase in traffic.</li> <li>Be aware of returning residents.</li> </ul>
ALL	<b>HEAVY EQUIPMENT OPERATIONS</b>	<ul style="list-style-type: none"> <li>Review IRPG (p. 80).</li> <li>Provide working space around equipment.</li> <li>Avoid working below equipment where rollout is a potential.</li> </ul>
DIV. T/U	<b>MERCURY MINES</b>	<ul style="list-style-type: none"> <li>Be aware of abandoned mercury mines on the East side of Walker Ridge.</li> </ul>
<b>Incident Name:</b>  <div style="text-align: center; font-size: 1.2em;"><b>Pawnee</b></div>		<div style="display: flex; justify-content: space-between;"> <div> Date Prepared: 6/27/2018  Prepared by: David Brockman  SOF1(T) <i>DBL</i> </div> <div> Operational Period:  6/28/2018 –6/29/2018  0700-0700 </div> </div>

*In readiness is all*

# **Abandoned Mercury Mines**

**Pawnee Incident-CA LNU 009002**

- There are abandoned mercury mines located in Branch VII, Division T in map sections 6, 7, 12, 13, 28 and 29.
- These areas are identified on the Operations Map with hashed-lined polygons keyed as a Life Safety Hazard.
- Access roads to the mines have been flagged off to restrict access to the sites.
- These areas are to be considered Life Safety Hazards for soil disturbance which may expose the underlying hazardous material.
- There are no Health or Inhalation Hazards if the identified areas are exposed to fire as the mines and material have been capped with soil.
- Restrict access around these areas for all personnel, vehicles and equipment.
- Avoid these areas for implementing control lines, staging areas or drop points.

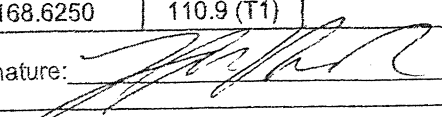

**IMT3 Safety Officer**

# TRAINING SPECIALIST MESSAGE

## TRAINERS/EVALUATORS:

The narrative in the ICS 225 (Performance Evaluation) should reflect the tasks performed by the trainee on the incident. Be as descriptive as possible.

## TRAINEES:

*Beat the Rush!!*

*\*\*\*Please see the TNSP prior to starting the demob process\*\*\**

In order to receive documented credit for your training assignment - you must close out with the Training Specialist before you demob. When as much work (as possible) has been completed in your PTB for this incident - Conduct the "close-out" process w the TNSP to save you time at DMOB

Bring the following to the "exit interview"

- Your properly initiated Position Task Book
- Completed and signed ICS 225 Performance Evaluation
- Completed and signed Evaluation Record

Forms are available at the Training Desk

Rob Scott TNSP 949-292-3207  
Justin Voyson TNSP-T 661-547-8629

# CAL FIRE INCIDENT MANAGEMENT TEAM 3

## DEMOBILIZATION MESSAGE Pawnee Incident CA-LNU-009002

We appreciate your efforts during this incident and want to make sure that we get you to your next destination safely and efficiently. When we begin demobilization, a Tentative Demobilization List will be posted in several places around base camp, including the briefing area and the eating area. If you are on this list, please adhere to the following:

### SHOW UP AT THE DESIGNATED TIME

- Show up at the designated time.
- Do not show up early.
- Do not show up late.

A demobilization schedule has been prepared in careful coordination with all essential demobilization functions. Not following the demobilization schedule can have significant negative impacts on the Demobilization Unit staff and all other resources scheduled for demobilization. We do not want you or any other resources to have unnecessary delays. Please adhere to your scheduled demobilization time.

### BE PREPARED FOR A RE-ASSIGNMENT

There may be other incidents in the state that are in need of resources. There is a possibility that some of the resources released from this incident will be immediately assigned to another one. Please make sure you are properly supplied, rested, and nourished while waiting for your designated demobilization time.

### BE THOROUGH AND EFFICIENT

Demobilization begins and ends at the Demobilization Unit. Please follow the instructions given to you when starting the demobilization process. Returning to the Demobilization Unit with a complete and accurate Demobilization Check-Out (ICS-221) form will help prevent any unnecessary delays and ensure you are shown as available for future assignments. Unforeseen delays can occur during the demobilization process, such as mechanical issues discovered while at Ground Support. Plan to visit the Time Unit towards the end of the demobilization process in order to provide an accurate accounting of your time.

Update

409.5

**MEDIA** – The California State Penal Code, Section 409.5(d) allows the news media to enter scenes of disaster, riot or civil disturbance. Properly identified members of the news media should not be restricted from entering locations specified within the code. However, this does not include crime scenes, private property and does not imply that the news media may interfere with incident operations while they are in the areas of concern. More information can be found [here](#).

**CAL FIRE SOCIAL MEDIA POLICY** – When assigned to a CAL FIRE incident, you will adhere to the CAL FIRE Social Media Policy, Section 0691. You can find further information about the CAL FIRE Social Media Policy [here](#).

Social Media

**PHOTOGRAPHS AND VIDEOS OF INCIDENT** – We are in a new era of media. Media no longer means news/broadcast industry, but now refers to anyone that has the capability to shoot video, photographs and post them onto social media sites in a matter of minutes. Unfortunately, we have seen some instances of photographs or videos that have depicted unsafe, unprofessional or embarrassing circumstances which are a serious breach of ethics. When this happens, it reflects poorly on all that are attached to this incident. Posting an inappropriate video, photo or blog comment could expose oneself to unwanted ramifications. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera loses their situational awareness.

The Public Information Office would like copies of the video and pictures that you safely took while not in an emergency situation, fire suppression activity or in an overhead assignment. Bring your video and pictures to the Public Information trailer; they will be reviewed and possibly uploaded to our many CAL FIRE social media sites. Remember, we don't want photographs or videos that depict unsafe, unprofessional or embarrassing circumstances, which are a serious breach of ethics.

**LOST AND FOUND** – The Information Section will manage lost and found items for the incident. If you have lost an item please leave your contact information and what you have lost at the Information Section. If you have found an item on the incident, bring the item to the Information Section with your contact information as well.

**MAIL SERVICE** – The Information Section can assist you with sending and receiving mail.

*In readiness is all*

## PAWNEE INCIDENT FINANCE SECTION MESSAGE

### **COST SHARE REPORTING CONTIUES:**

Line supervisors (DIVS, OPBD, STAM, etc.) Please check in with the Cost Share Team at the end of your shift. They are located in the white trailer on the west side of the OES unit.

### **SUPPRESSION DAMAGES:**

Please report all fire suppression damage to the Comp Claims Unit Leader. We will need location, lat/long, property owner, type of damage, etc. Examples of "fire suppression damage: Damaged fence, crush culverts, pipe damage, broken gates, etc.

### **SHIFT TICKETS / HIRED EQUIPMENT VENDORS:**

Line supervisors are responsible for completing shift tickets for all hired equipment resources working for them. Please turn completed shift tickets into the CAL FIRE Time Unit at the end of your shift. We will not accept shift tickets from vendors.

### **FEDERAL TIME:**

Federal agency timekeepers are on site and available to assist our federal government cooperators with personnel and equipment time.

### **LOCAL GOVERNMENT TIME KEEPING:**

The CAL OES representative is on site to handle F-42 and any questions you may have. If you are a local government cooperator from the Lake County / Napa County / Sonoma County area, please check in with the CAL FIRE Time Unit.

**Absolutely no off site feeding or purchases charged to the incident. They must be pre-approved by the Logistics Section and/or Finance Section Chief. The Motel Tech Spec will have information on this.**

**ALL FINANCE FUNCTIONS ARE LOCATED IN THE "LITTLE THEATER" BUILDING JUST WEST OF THE FEEDING AREA.**

**ROGER RAINES, FSC1, IMT3**

**TERRY EASTWOOD, FSC1, IMT3**

# WATER USAGE REPORT

Division / Group: \_\_\_\_\_

REQUEST # \_\_\_\_\_

I.e.. Strike Team 1110C, Acme Water Tenders

[illegible]

**\*\*Please note PROPERTY OWNER AND CONTACT NUMBER! (Use reverse side if needed.)**

The intent of this document is to track, record and validated the amount of water used on a incident. It's not intended to review the performance of equipment using the water on an incident.

In readiness is all

## FIRE SUPPRESSION REPAIR PLAN: PAWNEE INCIDENT

Fire suppression repair is the repair of damage caused directly from fire suppression activities. It is not the repair of infrastructure or rehabilitation of burned areas that happened as a result of the fire itself.

Damaged facilities will be upgraded to their pre-fire condition. Projects too large or complex to be completed by the Fire Suppression Repair Group shall be transferred to the Comp/Claims Unit or the local Unit. Repair work shall only occur in locations authorized by the Operations Division and where fire suppression activities are complete. Fire Suppression Repair Group resources shall evaluate all Divisions for appropriate repair needs. This includes areas inside and outside the fire perimeter, provided the damage was caused by official fire suppression activities. Extra care will be exercised and equipment will be monitored when operating in locations where new fire starts are more likely to occur, such as rocky areas in dry grass. New fires will be reported following the instructions in the radio call plan.

Examples of items that may be repaired include, but are not limited to:

Infrastructure Damage	Natural Resource Damage
Fences and gates	Soil erosion
Culverts, bridges, and other watercourse crossings	Adverse impacts to air and water quality
Water sources	Adverse impacts to protected species of plants and animals
Utility distribution lines (above or below ground)	
Road barriers removed for fire access	
Trash, debris, and supplies left by fire suppression resources	
Miscellaneous damage to residential property	

## Dozer Line Repair

**Dozer Line Repair**

Dozers construct both fire and contingency lines. Dozer line width varies greatly. The following measures shall be implemented for constructed dozer line:

- Berms and push-piles shall be spread out to the extent feasible. This may be accomplished by back-blading and/or using ripper shanks or grapples. Debris piled against trees or perched above watercourses is especially important to remove or disperse.
- Waterbreaks shall be constructed at a 30-45 degree angle and shall be a minimum depth of 12 inches from the bottom of the cut to the top of the berm. Where feasible, the discharge from waterbreaks shall be directed into vegetated or rocky areas.
- Where slopes exceed the range at which a tractor can effectively work, waterbreaks shall be constructed with hand tools.
- Roads used in fire suppression activities shall be left in the same condition they were found or better. Gravel and soil-surfaced roads shall be watered to prevent excessive dust. Where fire suppression activities have damaged or rendered road drainage facilities non-functional, waterbreaks or drivable dips shall be installed for drainage.
- Where fire suppression activities have filled in or damaged inside ditches, the ditches shall be cleaned and left unobstructed.
- Spacing of waterbreaks shall be as follows:

Prevailing gradient	Maximum waterbreak spacing
0-10%	200 feet
11-25%	150 feet
26-50%	100 feet
>50%	75 feet

*Spacing criteria is a general guide. Actual location of waterbreaks should be tailored to the topography and placement suited to the best dispersal of water flow.*

## **Archaeological and Historic Properties: General Fire-line Guidance**

**Do not compromise safety for the protection and preservation of archaeological and historic properties.  
When possible and prudent:**

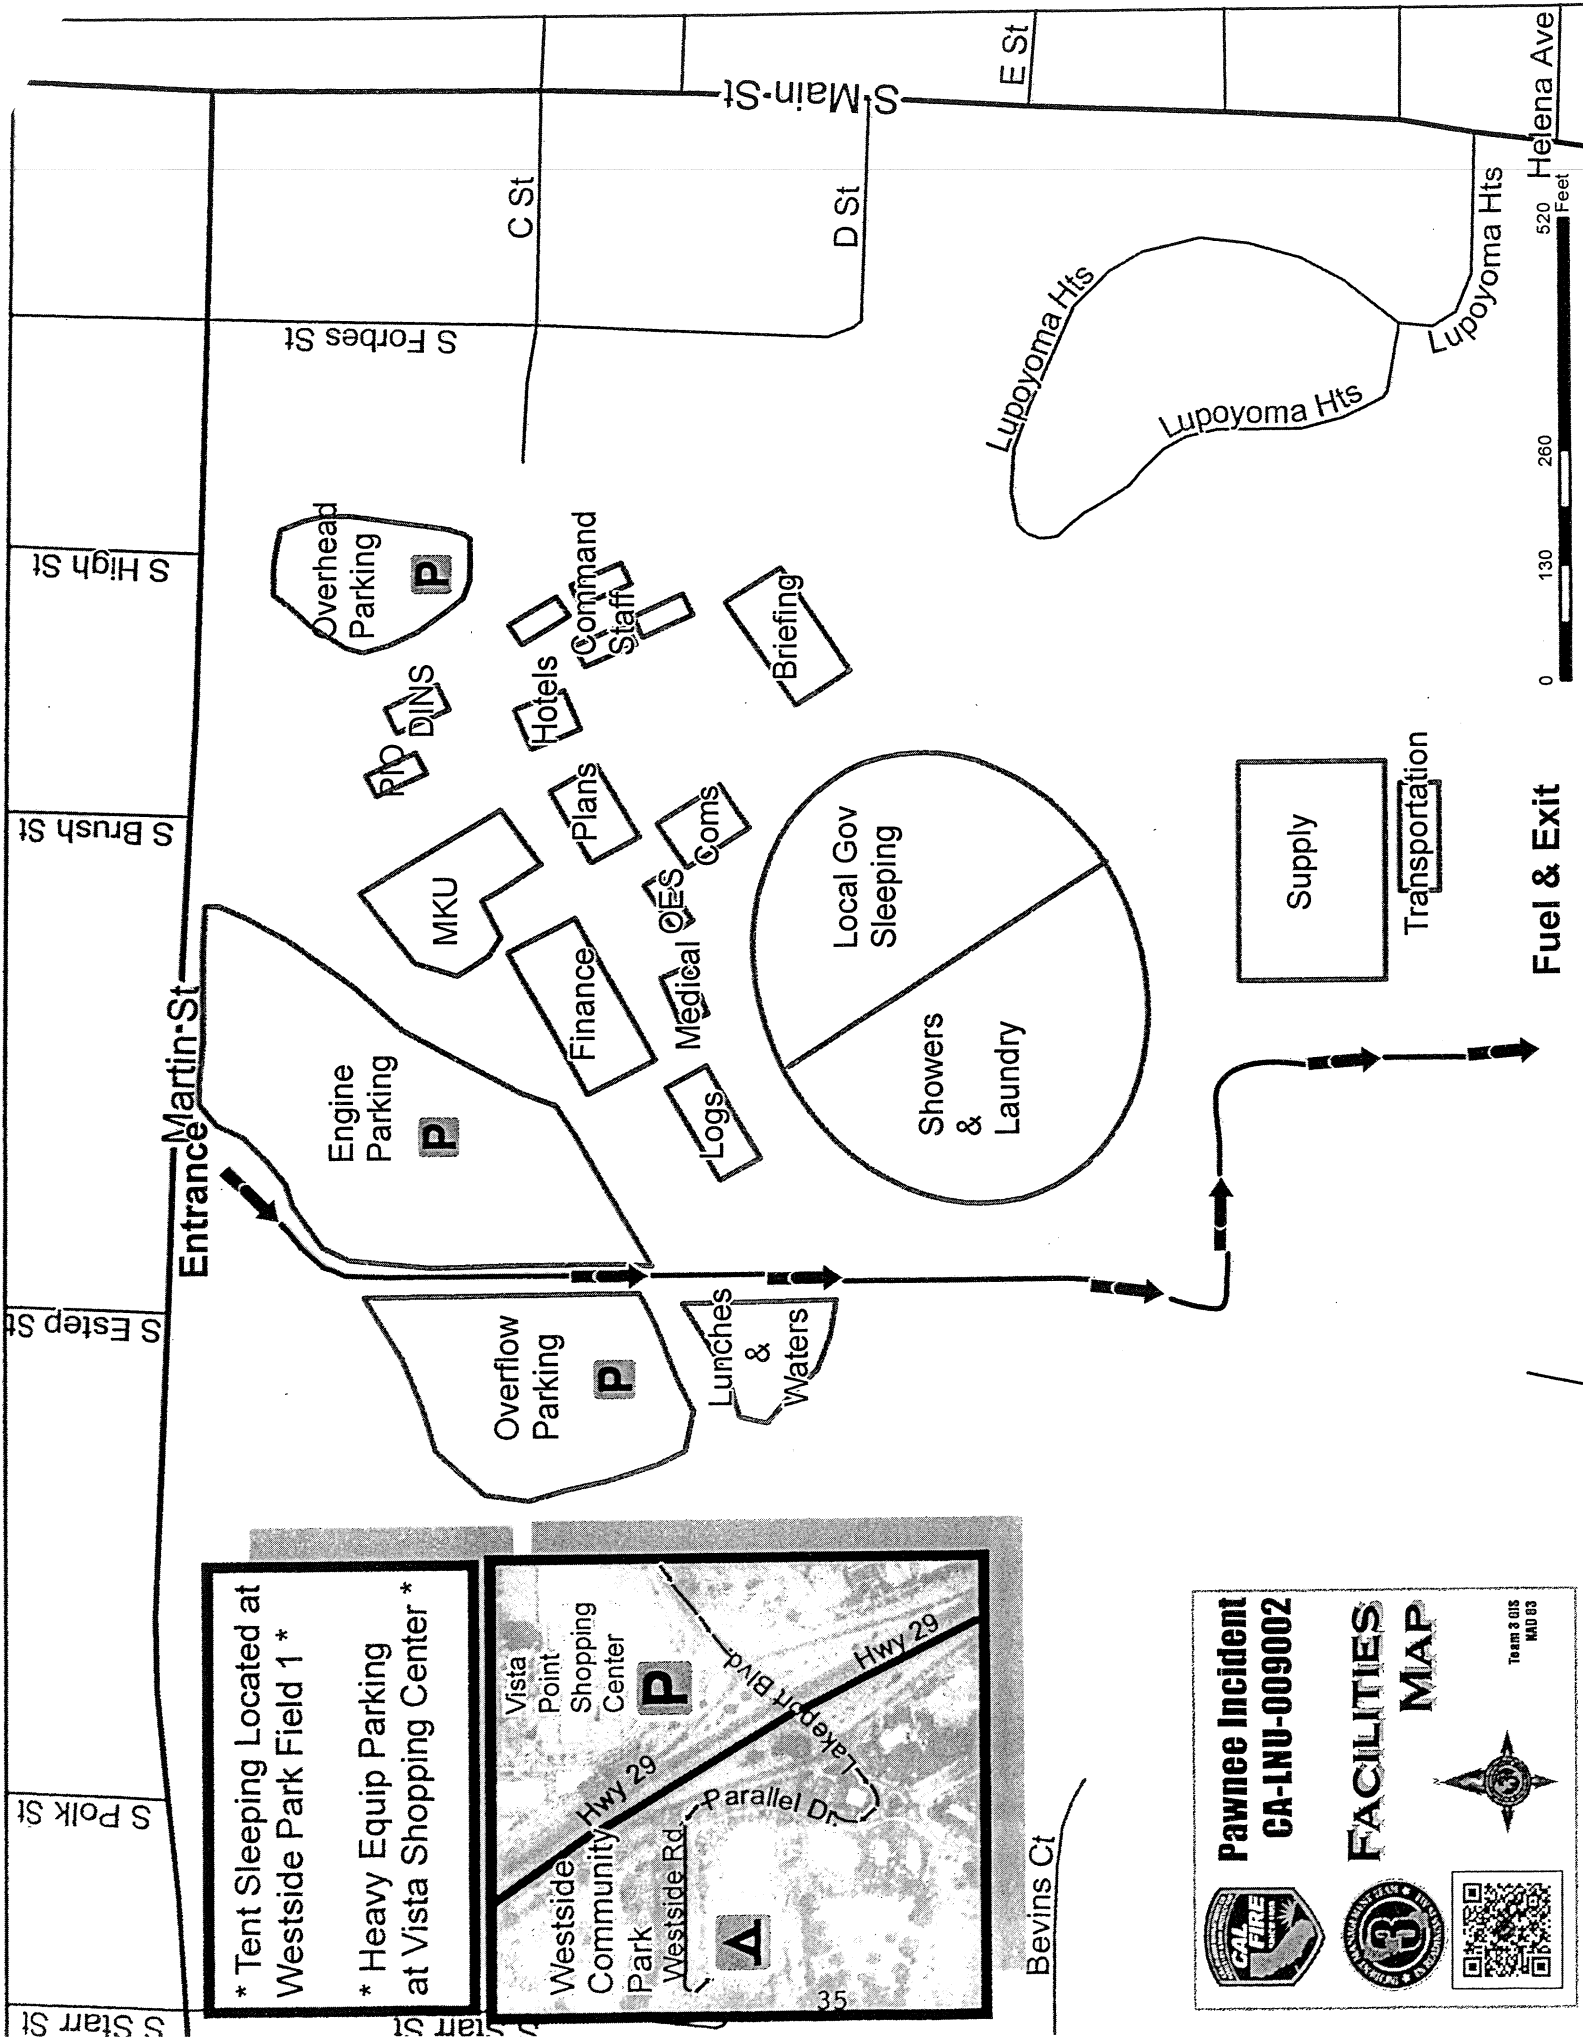

1. Be on the lookout for prehistoric and historic archaeological sites. These sites typically occur adjacent to streams and springs, confluences are often especially sensitive. However, sites can occur in other areas too. The most common indicators of prehistoric sites in this area (North Coast Ranges) are scatters of shiny black obsidian flakes from tool making activities and dark midden soils. Historic-era sites include homesteads that contain foundations, rock chimneys, and stone / brick-lined wells. Historic-era mining sites are possible as well.
2. Note, that much of the area has ever been surveyed for archaeological resources and many sites out there have yet to be discovered.
3. If you observe archaeological resources, flagged or unflagged, attempt to avoid with ground disturbing activities altogether.
4. If avoidance is not possible, minimize ground disturbance. Use a hand crew rather than a dozer to remove fuels from control lines that must cross site areas if possible.
5. Leave all artifacts in place as some may have been intentionally placed for religious or ceremonial reasons.
6. Note locations of discovered resources on a map, better yet, take site coordinates with a GPS. Leave information for the archaeologist so that the sites can be relocated and protected during Fire Suppression Repair. Flag the site in red if possible.
7. If you encounter a burial or other human remains, cease work in that area and contact the archaeologist immediately.

Your help preserving California's non-renewable cultural resources is appreciated.
